Project:

ISO/IEC JTC1/SC22/WG21 14882: Programming Language — C++

Audience:

WG21

Table of Contents

1 Introduction

2 Voting

2.1 How to Vote

2.2 Voting Timeline

3 Poll Structure

3.1 C++23 Polls

3.1.1 [P2539R3] `print` To Terminal Synchronization

3.1.2 [LWG3515] [stacktrace.basic.nonmem]: `operator<<` Should Be Less Templated

3.2 C++26 and Technical Specification Polls

3.2.1 [P2631R0] Publish The Library Fundamentals v3 Technical Specification Now

3.2.2 Don't Publish The Library Fundamentals v3 Technical Specification

3.2.3 [P1083R6] `resource_adaptor`

- 3.2.4 [P2587R3] `to_string` Or Not `to_string`
- 3.2.5 [P2495R1] Interfacing `stringstreams` With `string_view`
- 3.2.6 [P2510R3] Formatting Pointers
- 3.2.7 [P2572R0] `std::format` Fill Character Allowances
- 3.2.8 [P2511R2] Beyond `operator()`: NTTP Callables In Type-Erased Call Wrappers
- 3.2.9 [P2592R2] Hashing Support For `chrono` Value Classes
- 3.2.10 [P0543R2] Saturation Arithmetic
- 3.2.11 [P0870R4] `is_convertible_without_narrowing`
- 3.2.12 [P2614R1] Deprecate `numeric_limits::has_denorm`

Informative References

§ 1. Introduction

This paper contains the decision polls that the C++ Library Evolution group will take in 2022-10.

§ 2. Voting

These decision polls will be conducted electronically; see [\[P2195R2\]](#) for more information on electronic voting procedures.

All committee members may vote, but if you have not participated in the Library Evolution discussions of a poll, please choose to not vote.

§ 2.1. How to Vote

[Vote here \(C++23 polls\).](#)

[Vote here \(C++26 and Technical Specification polls\).](#)

A `documents.isocpp.org` account is necessary to vote. If you have an `isocpp.org/papers` account, a `documents.isocpp.org` account has been created for you. Just go to `documents.isocpp.org` and reset your password. Email [Bryce Adelstein Leibach](#) if you do not have an account or are having trouble accessing your account.

If you see "Form not found" when you go to the above link, you are not signed in to documents.isocpp.org. Go to documents.isocpp.org and sign in first.

You will not receive a confirmation email after voting. The Library Evolution chairs will send a confirmation to all voters before the close of the poll.

If you need to change how you voted or have any questions or issues about voting, please email [Bryce Adelstein Lelbach](#).

§ 2.2. Voting Timeline

- 2022-09-23: Draft polls distributed by mailing list.
- 2022-09-27: Final Library Evolution discussion telecon on the polls.
- 2022-09-27: Start of the polling period.
- 2022-10-25: End of the polling period.
- 2022-10-28: Chairs share results and summarize outcomes.

§ 3. Poll Structure

Each poll consists of a statement; you vote on whether you support the statement. All polls will be 5-way polls; you'll vote either "strongly favor", "weakly favor", "neutral", "weakly against", or "strongly against".

Polls phrased as "Return X" indicate that the paper was sent to Library Working Group in the past, and Library Working Group returned it to us with questions. Polls phrased as "Send X" indicate that the paper has not previously been sent to Library Working Group.

All committee members may vote, but if you have not participated in the Library Evolution discussions of a poll (in-person, over telecon, or over email), please consider whether you sufficiently understand the topic to be able to vote in an informed manner. If you do not, please choose to not participate in the poll.

If you do not want to participate in a poll, select the "I do not want to participate in this poll" option. Those who do not participate in a poll will not be counted or recorded. Voting neutral is not the same as choosing to not participate; please don't vote neutral if you did not participate in the discussions of the poll.

Each poll has a comment field. Please write a few sentences explaining the rationale for your vote. We recommend drafting your comments in a text editor and then pasting them into the polling system.

Poll results and selected comments will be shared with Library Evolution after the end of the polling period, including attribution of your votes and comments.

If you want to discuss the polls or how you plan on voting, please start an email thread on the [Library Evolution mailing list](#).

You will not receive a confirmation email after voting.

If you need to see how you voted, change how you voted, or have any questions or issues about voting, please contact the Library Evolution chair.

§ 3.1. C++23 Polls

§ 3.1.1. [\[P2539R3\]](#) `print` To Terminal Synchronization

Return [\[P2539R3\]](#) `print` To Terminal Synchronization to Library Working Group for C++23, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).

§ 3.1.2. [\[LWG3515\]](#) `[stacktrace.basic.nonmem]: operator<<` Should Be Less Templated

Send the proposed resolution to [\[LWG3515\]](#) `[stacktrace.basic.nonmem]: operator<<` Should Be Less Templated to Library Working Group for C++23, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).

§ 3.2. C++26 and Technical Specification Polls

§ 3.2.1. [\[P2631R0\]](#) Publish The Library Fundamentals v3 Technical Specification Now

Publish the Library Fundamentals v3 Technical Specification now as per [\[P2631R0\]](#).

§ 3.2.2. Don't Publish The Library Fundamentals v3 Technical Specification

Don't publish the Library Fundamentals v3 Technical Specification, but evaluate its contents for inclusion into a future International Standard.

§ 3.2.3. [\[P1083R6\]](#) **resource_adaptor**

Return [\[P1083R6\]](#) resource_adaptor to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.4. [\[P2587R3\]](#) **to_string Or Not to_string**

Send [\[P2587R3\]](#) to_string Or Not to_string to Library Working Group for C++26, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).

§ 3.2.5. [\[P2495R1\]](#) **Interfacing stringstream With string_view**

Send [\[P2495R1\]](#) Interfacing stringstream With string_view to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.6. [\[P2510R3\]](#) **Formatting Pointers**

Send [\[P2510R3\]](#) Formatting Pointers to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.7. [\[P2572R0\]](#) **std::format Fill Character Allowances**

Send [\[P2572R0\]](#) std::format Fill Character Allowances to Library Working Group for C++26, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).

§ 3.2.8. [\[P2511R2\]](#) **Beyond operator(): NTTP Callables In Type-Erased Call Wrappers**

Send [\[P2511R2\]](#) Beyond operator(): NTTP Callables In Type-Erased Call Wrappers to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.9. [\[P2592R2\]](#) **Hashing Support For chrono Value Classes**

Send [\[P2592R2\]](#) Hashing Support For chrono Value Classes to Library Working Group for C++26, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).

§ 3.2.10. [\[P0543R2\]](#) Saturation Arithmetic

Send [\[P0543R2\]](#) Saturation Arithmetic to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.11. [\[P0870R4\]](#) `is_convertible_without_narrowing`

Send [\[P0870R4\]](#) `is_convertible_without_narrowing` to Library Working Group for C++26, classified as an addition ([\[P0592R4\]](#) bucket 3 item).

§ 3.2.12. [\[P2614R1\]](#) Deprecate `numeric_limits::has_denorm`

Send [\[P2614R1\]](#) Deprecate `numeric_limits::has_denorm` to Library Working Group for C++26, classified as an improvement of an existing feature ([\[P0592R4\]](#) bucket 2 item).
