1.4 Future plans (Informative) [general.plans]

This section describes tentative plans for future versions of this technical specification and plans for moving content into future versions of the C++ Standard.

~~The C++ committee intends to release new versions of this technical specification periodically, containing the library extensions we hope to add to a near-future version of the C++ Standard. F~~ This is the last in a series of revisions of this technical specification planned by the C++ committee; while there are no plans to resume the series, any future versions will define their contents in `std::experimental::fundamentals_v4`, `std::experimental::fundamentals_v5`, etc., with the most recent implemented version inlined into `std::experimental`.

When an extension defined in this or a future version of this technical specification represents enough existing practice, it will be moved into the next version of the C++ Standard by removing the `experimental::fundamentals_vN` segment of its namespace and by removing the `experimental/` prefix from its header's path.
