Project:

ISO/IEC 14882 Programming Languages — C++, ISO/IEC JTC1/SC22/WG21

Audience:

WG21

Table of Contents

1 Introduction

2 Poll Outcomes

3 Selected Poll Comments

3.1 Poll 1: Send "[P3774R1] Rename std::nontype, and make it broadly useful" to Library Working Group as a DR (fix) for C++26.

3.2 Poll 2: Send "[P3798R1] The unexpected in std::expected" to Library Working Group for C++29.

§ 1. Introduction

In 2025-10, the C++ Library Evolution group conducted a series of electronic decision polls [\[P3872R0\]](#). This paper provides the results of those polls and summarizes the results.

In total, 9 people participated in the polls. Thank you to everyone who participated, and to the papers' authors for all their hard work!

§ 2. Poll Outcomes

- SF: Strongly Favor.
- WF: Weakly Favor.
- N: Neutral.
- WA: Weakly Against.
- SA: Strongly Against.

Poll	SF	WF	N	WA	SA	Outcome
Poll 1: Send " [P3774R1] Rename std::nontype, and make it broadly useful" to Library Working Group as a DR (fix) for C++26.	3	5	0	0	1	Consensus in favor
Poll 2: Send " [3798R1] The unexpected in std::expected" to Library Working Group for C++29.	6	2	0	0	0	Strong Consensus in favor

All the polls have consensus in favor and the papers will be forwarded to LWG.

§ 3. Selected Poll Comments

For some of the comments, small parts were removed to anonymize.

§ 3.1. Poll 1: Send "[\[P3774R1\]](#) Rename std::nontype, and make it broadly useful" to Library Working Group as a DR (fix) for C++26.

I fully agree with this paper, the new names are a considerable improvement.

— Strongly Favor

Getting away from "nontype" name is important. Choice of new name is not optimal but acceptable.

— Weakly Favor

Positive names are better than negative names (things with not, non, etc.).

— Weakly Favor

Reconsider R0 / P3843R0.

— Strongly Against

§ 3.2. Poll 2: Send "[P3798R1] The unexpected in std::expected" to Library Working Group for C++29.

Seems very appropriate for reasons of symmetry. I looks much more like an oversight or defect, so I would also suggest it for C++26.

— Strongly Favor

I'm all for more expressive code. Minimal interfaces are not easy to teach, to discover and to read.

— Strongly Favor

This is a simple enough addition to improve usability. While I don't see a strong need for this change, there is no reason not to do this.

— Weakly Favor
