§ 1 Introduction

In response to LEWG direction on [[LWG4361](#)], this paper provides wording to make the receiver_of and sender_to concepts exposition-only for C++26.

§ 2 Wording

Instructions to the editor:

After applying *all other papers* moved during the Croydon meeting *except* [[P4154R0](#)], make the following changes in Clause 33 [[exec](#)]:

- Add an `// exposition only` comment to the declaration of sender_to in 33.4 [[execution.syn](#)] and its definition in 33.9.3 [[exec.snd.concepts](#)].
- Add an `// exposition only` comment to the declaration of receiver_of in 33.4 [[execution.syn](#)] and its definition in 33.7.1 [[exec.recv.concepts](#)].
- Replace all instances of sender_to with *sender-to*.
- Replace all instances of receiver_of with *receiver-of*.
